

Daily Programme.

Time change reminder.

Please be advised that early this morning, Saturday, 16 January the ship's time was SET BACK BY ONE HOUR.

From the navigator.

This morning finds Queen Victoria clearing the Mid-Atlantic Ridge which we crossed yesterday evening into the early hours of this morning. The Mid-Atlantic Ridge (MAR) is a mid-ocean ridge, a divergent tectonic plate or constructive plate boundary located along the floor of the Atlantic Ocean, and part of the longest mountain range in the world. In the North Atlantic, it separates the Eurasian and North American Plates. Although the Mid-Atlantic Ridge is mostly an underwater feature, portions of it have enough elevation to extend above sea level. The ridge has an average spreading rate of about 2.5 cm per year.
